TITLE : ABSORPTION ARTICLE

ABSTRACT : PROBLEM TO BE SOLVED: To provide an absorption article wherein excrements do not flow on a surface sheet and leak out.

SOLUTION: In an absorption article with a liq.-permeable surface sheet 2, a liq.-impermeable back surface sheet 3 and an absorption body 4 arranged between both sheets 2 and 3, at least one channel part 5 is provided on the site corresponding to at least a part under the crotch of the surface sheet 2 in the longitudinal direction and the channel part 5 is formed by bending the surface sheet 2 so as to make the surface sheet 2 parts face together and the channel part 5 is bonded intermittently in the longitudinal direction to form a pocket 8 with an opening part on the surface sheet 2 and in addition, a space is formed between the surface sheet 2 and the absorption body 4.
